Introduction

Content of Video Library

1. Andreas Schleicher: Use data to build better schools

http://www.ted.com/talks/andreas_schleicher_use_data_to_build_better_schools/transcript?language=en

TEDGlobal 2012 · Filmed July 2012 · 19:47

It is available in 29 languages, and switching on the interactive transcript, you can read the whole text of the presentation in your language.

This presentation can be very useful for all of us, because the PISA tests comparing a number of figures which are significant for the future better educational performance. There are many good examples: we can see through Korea to Poland from Germany, but we have to find our own way. Yes, we have to find the factors behind the weaker results of the students' reading and math skills.

"High-performing systems are very careful in how they recruit and select their teachers and how they train them. They watch how they improve the performances of teachers in difficulties who are struggling, and how they structure teacher pay. They provide an environment also in which teachers work together to frame good practice."

"The goal of the past was standardization and compliance."

2. Lannert Judit: Schools' efficiency, successful schools, presentation on the conference

and on Hungarian and European studies of this field.

<https://youtu.be/46GecbxsTw4>

We recommend Judit Lannert education researcher's lecture to everyone because it gives a perfect overview of the topic. If you want to analyse the quality of education, its levels and "actors" if you want to know more about the Research and research results, it is important to follow this lecture.

The conclusions of the presentation: there are several factors effecting the performance of the performance of the school, of the students: the size of the classes, the quality of school management, spending per students etc. BUT the most significant factor the le is the quality of teaching staff.

3. Summerhill (2008)

<https://youtu.be/TxngqMavda0>

This MOVIE tells **the story of a school of freedom** which allows students to pursue their own interests, talents and passions. The UK government almost succeeded in shutting it down because it didn't force their students to memorize useless facts.
