Consultation with teacher – as the role of teachers in the quality of education

Aim of the Consultation

Discussion and change of experiences related to the headline.

Location: SZÁMALK-Szalézi Szakközépiskola Budapest, Mérnök u. 39. II. épület földszint 36.

Date: 10.02.2016

There is strong and positive correlation between the result of the children and the preparation for the lessons of the teachers.

The „product” is not the result. The most important thing is that the experience of the children related to learning process.

According to the discussion about „quality in the teaching practice” the teachers should write lesson plan.

If it is necessary the teacher can modify it after the lesson.

It is important to highlight that the reflection is very important for development

If you can record the sessions, of reflection and documentation purposes, it would be a huge database of available methods for analysing success.

The quality of education is greatly enhanced by collaboration and knowledge sharing among teachers. A teacher communities that work as a team, and move in one direction, can be very effective

Everybody felt that the arised questions were interesting but the opinion of participants is that the answare were not reached always

The participants agreed that after weeks of consultation they continue the conversation in the form of a website forum at <http://oqacourse.itstudy.hu/>
